

BREAKING NEWS

November, 10th 2006

On November 8th, the CEO/Managing Partner of ICS Penetron International, Ltd. Robert Revera announced a new strategic decision. As of November, 2006, our facility in Russia has begun to supply various distribution networks throughout Asia and Europe directly.

As stated by Robert Revera, "The plant in Russia was built according to Penetron standards and under Penetron control. They started producing materials for an extended market (not only for Russia) after a series of strict tests and ISO 9001-2000 certification. We highly value our reputation and are proud of the quality of our production and state-of-the-art technology. Igor Chernogolov, who has been our reliable partner for many years, has greatly contributed to establishing and strengthening Penetron's standing in the former Soviet Republics . His cooperation and efforts in supplying Asia and Europe directly are greatly appreciated and we thank him for his cooperation."
